<tr>
<td>09:00 – 10:30</td>
<td>New rules for data sharing will enter into force in Sept 2025. Amongst other provisions, the legislation seeks to facilitate access to data generated by connected products, ensure fair terms for data sharing and facilitate switching between cloud providers. In this session we explore what steps will be needed to implement the new rules and how businesses can take advantage of the opportunities for data access and porting.</td>

<tr>
<td>11:00 – 12:30</td>
<td>The Digital Services Act has introduced new measures which seek to protect consumers from hate speech and misinformation online, including requirements regarding content moderation and risk assessment for very large online platforms. These provisions (and the ability of the European Commission and national Digital Service Co-ordinators to effectively enforce them) will be tested to the full with upcoming elections and the inclusion of pornographic platforms within the list of very large online platforms. The Commission has already announced formal proceedings for non-compliance against X and TikTok under the DSA. Platforms will also need to comply with new requirements stemming from the DSA around transparency in advertising and the ban on exposing children to targeted advertising based on their personal data. In this session, following a keynote introduction from Rita Wezenbeek, Director for Platforms Policy and Enforcement at DG CNECT, European Commission, we will hear from Digital Service Co-ordinators, academics, large platforms and civil rights organisations about progress in implementation and the challenges that lie ahead.</td>

ENFORCING THE DIGITAL MARKETS ACT

The Digital Markets Act seeks to promote fair and open digital markets by applying constraints on the conduct of gatekeeper platforms. Key requirements include prohibitions on self-preferencing and steering, enabling alternative app stores and direct downloads of applications, support for vertical interoperability and requirements to make key data including advertising data available to competitors and/or customers. In this session, Alberto Bacchiega, Director for digital platforms at DG Comp, European Commission will provide an overview of the initiatives taken to enforce the DMA. His keynote speech will be followed by two mini-panels in which industry representatives discuss issues relating to (i) mobile ecosystems; and (ii) search and advertising.

10:00 – 11:30 KEYNOTE DEBATE: FUTURE RULES FOR THE TELECOM SECTOR

In February 2024, the Commission launched a white paper with wide-ranging proposals for the future regulation of the telecom sector. These include proposals to expand the scope of the EU Electronic Communications Code to include cloud, set a target of 2030 for copper switch-off, phase out ex ante regulation, introduce an EU-wide virtual access product, harmonise spectrum authorisation processes, and establish a country of original principle for certain activities in the telecom field. In this session, we hear the perspectives of the Commission, BEREC and leading industry representatives on these proposed new measures.

Kamila Kloc, Director Digital Decade and Connectivity, DG CNECT, European Commission

Robert Mourik, Commissioner ComReg, BEREC Chair 2025

11:30 – 12:00 Break

12:00 – 13:00 DEBATING THE CASE FOR CONSOLIDATION

In recent years we have seen a renewed push for in-market consolidation with high profile mobile merger cases in countries such as Spain and the UK. The business model underlying infrastructure companies including Towercos and fibre JVs is also based on limiting duplication in infrastructure and maximising wholesale market shares. In this session we hear from competition authorities and operators about the benefits and threats of consolidation and debate how far competition policy should go in constraining these developments.

KEYNOTE Carlota Reyners Fontana, Director IT and Digital, DG Competition of the European Commission, currently seconded to the Cabinet of the President of the European Commission as acting Digital Advisor

Ben Wreschner, Group Regulatory Policy Director, Vodafone
